

Viasat, Inc.	Process Area: Engineering	Document Number: PR001158	Revision: 005
Name of Document: Environmental Guidelines for Packaging & Product Labeling		Process Category: Environmental Compliance	Page: 1 of 18

1 Purpose and Scope

The purpose of this document is to cover Recycling, Reuse and other Regulatory marking requirements for Viasat Inc. packaging (shipping materials) and Section 2.4 covers finished product environmental markings. Fulfillment organization has created document number PR000533 that may cover other marking requirements.

2 Packaging Documentation Compliance

2.1 Use RoHS drawing template PR000522 for all packaging drawings. This will cover the China RoHS packaging requirement. Please add the following statement(s) on Packaging Drawings.

- All materials used in packaging must not contain heavy metals exceeding the following amounts at the homogenous material level; Cadmium-50 PPM, Lead 100 PPM, Mercury- 100 PPM, Hexavalent Chromium- 100 PPM per Directive 94/62/EC and other applicable EU laws.
- The European "REACH" Regulation Directive 1907/2006 on **Registration, Evaluation & Authorization and Restriction of Chemicals** entered into force June 1, 2007. REACH requires more communication between customers, suppliers and manufacturers on substances used in the products and packaging. Given the new legal requirements, Viasat Inc. requests that the supplier provide all substance data for products substance weight/total product weight (wt/ total wt) that is supplied to Viasat Inc. If the supplier does not have this capability; then at a minimum they must provide disclosure to the SVHC's (Substances of Very High Concern) substances contained in their product listed in Appendix XIV of Article 33 of REACH Directive 1907/2006. Please note that it is to the supplier's advantage to provide all substances. As a Supplier to Viasat Inc. you shall be required to automatically provide REACH substance updates when chemical substances of the product or the SVHC list is updated if all substances and amounts are not disclosed upfront. Updated communication is required with out a formal request from Viasat. These updates can be sent to the following email address:

Compliance-ProductEnvironmental@viasat.com

- Also, if any SVHC substance is above 0.1% (wt/twt), please provide a Communication Data or MSDS sheet on how to handle, use and properly dispose of this product. The current list of SVHC can be found at on the ECHA Website:
http://echa.europa.eu/chem_data/authorisation_process/candidate_list_table_en.asp
- Use PR000634 for packaging Material Declarations if the supplier does not have a form to provide packaging compliance data

Name of Document: Environmental Guidelines for Packaging & Product Labeling	Document Number: PR001158	Revision 005	Page: 2 of 16
-------------------------------------------------------------------------------------------	-------------------------------------	------------------------	-------------------------

3 Packaging Material and Packaging Marking

3.1 Shall be designed using reusable and/or recyclable corrugated board, card fiber board, paper board, plastics, paper, foam or wood products and of sufficient strength to protect the product for multiple individual shipments. Please refer to Addendum 1- "Packaging Marking & Allowable Packaging Substance Limit Guidelines for Various Countries" for specific country marking and heavy metal requirements.

- Corrugated board recycling marks are as follows:

Where: CB =China Req. PAP = EU Req. Corrugated Symbol = USA Req.

Please refer to Country Specific documents for other Material type markings if needed. The symbols above are for reference only and may not represent the latest requirements. It is the supplier's responsibility to following the latest applicable laws and marking requirements.

3.2 Plastic/Foam Marking

- Marking shall adhere to EU SPI Codes per document 1045446, China RoHS and South Korea (Optional) plastic marking requirements may also be required.
- See example below which also includes additional country markings

3.3 Reuse Marking on Packaging

- When packaging is designed for reuse this marking shall be printed or labeled on the outside of the reusable packaging material

Note: (Fill in arrow color to match other packaging marking)

Name of Document: Environmental Guidelines for Packaging & Product Labeling	Document Number: PR001158	Revision 005	Page: 3 of 16
-------------------------------------------------------------------------------------------	-------------------------------------	------------------------	-------------------------

3.4 **Packaging marking where batteries are installed or shipped with the product** – Refer to the EHS procedures:

- PR000757 - Safety Guidelines for the Use and Storage of Batteries
- PR001241 – Shipment of Products Containing Lithium Batteries

Figure 4: Example of Packaging marking

Example of Packaging mark on bottom of corrugated packaging or corrugated inserts: This will cover 85% of general corrugated marking requirements.

Note: 1. Vendor marking and burst pressure not included in this example

2. Images not to scale

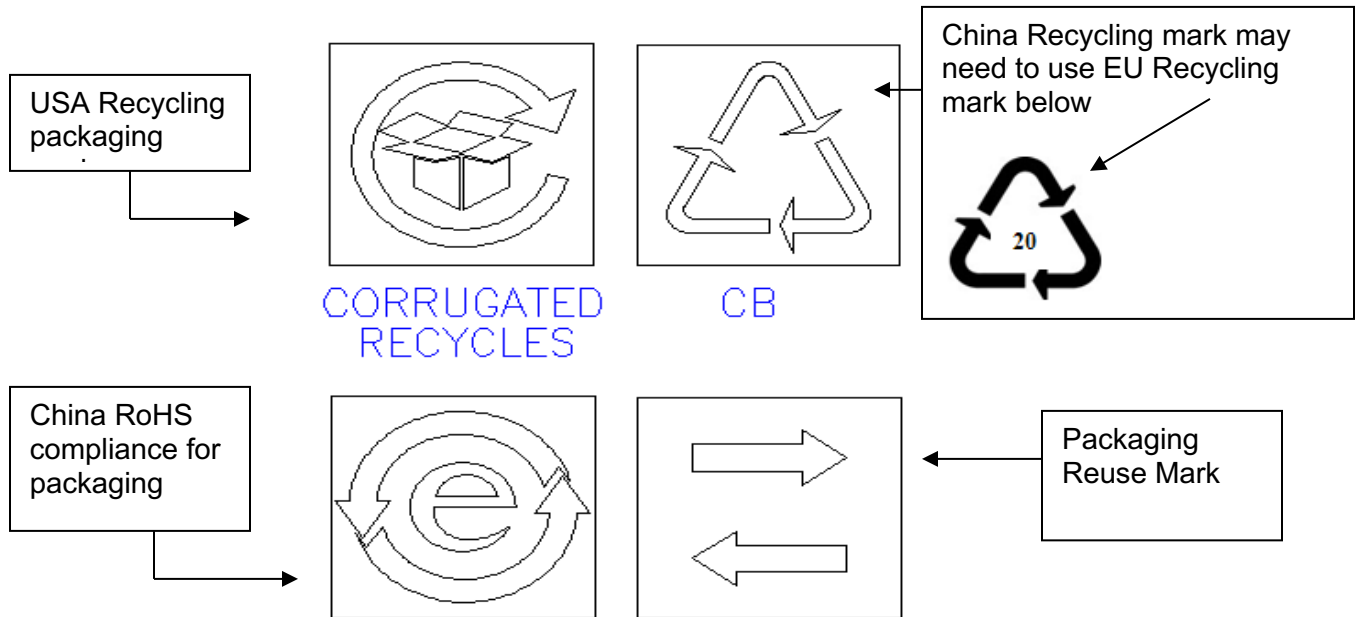

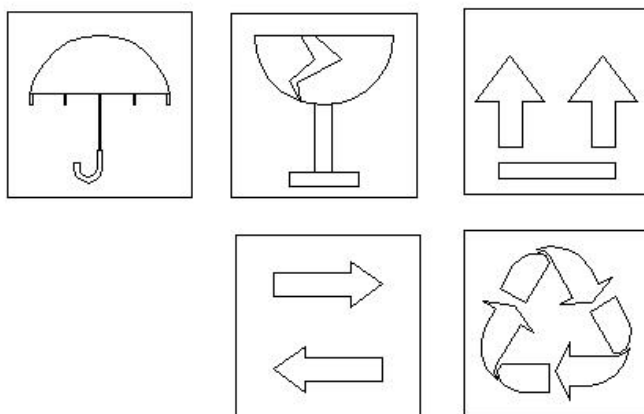

Figure 5: Example of General Product marking on 2-sides of cardboard packaging:

Note: Product label marking and ESD marking is not included

Name of Document: Environmental Guidelines for Packaging & Product Labeling	Document Number: PR001158	Revision 005	Page: 4 of 16
-------------------------------------------------------------------------------------------	-------------------------------------	------------------------	-------------------------

b. Apply other industry Marks as required.

-------------------------------------------------------------------------------------------	-------------------------------------	------------------------	-------------------------

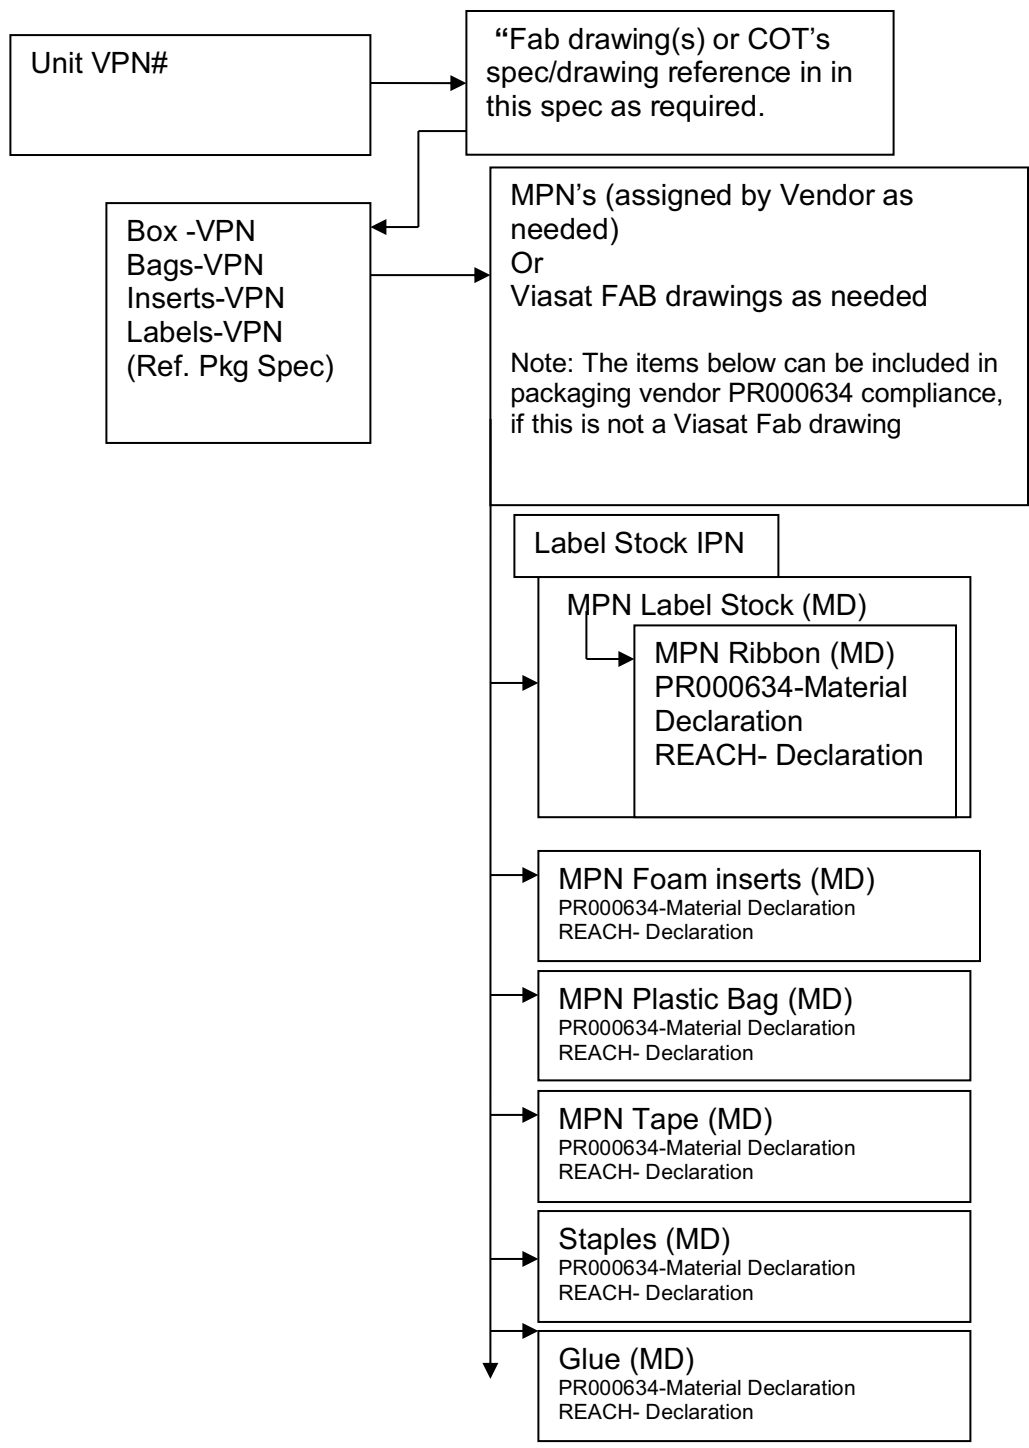

3.5 Product & Packaging ID Label/Marking

Product Identification label must include the following:

- 1) Logo: Contact, Viasat, Configuration Management for appropriate logo file (several file types available; eps, bpm, jpg, pdf, etc.)
- 2) Division Street Address- Full Postal Address
- 3) Product part number ID: "1043581" Rev. xx where xx=(current revision).
- 4) Description "RACK MTG KIT, IDU, LINKWAY S2".
- 5) Quantity "QTY-1", (not required for product marking only for packaging marking).
- 6) DOM: Date of Manufacture Format: YYYY-MM-DD (use leading zeros for single digit months) EX.2008-02-30.
- 7) Origin of manufacture (ex. Made in China) – Note: Marketers and manufacturers promoting their products as Made in USA must meet the "all or virtually all" standard per "Complying with the Made in USA Standard" via the Federal Trade Commission.
- 8) WEEE marking, China RoHS marking, other regulatory marking (when applicable).
- 9) Arial, true font.
- 10) Label/Marking font size is optional to contract manufacturer depending on external package size. Label/Marking shall readable from a distance of 18"-24" with normal corrected vision.

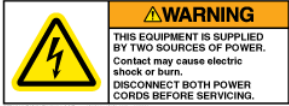

3.5.1 Please use Over-pack Marking Specification- Reference PR000607 for Over-pack marking

Name of Document: Environmental Guidelines for Packaging & Product Labeling	Document Number: PR001158	Revision 005	Page: 7 of 16
-------------------------------------------------------------------------------------------	-------------------------------------	------------------------	-------------------------

3.6 Safety Compliance, Power Input Rating, and Common Symbols Guide

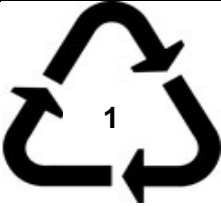

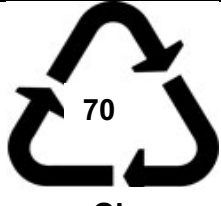

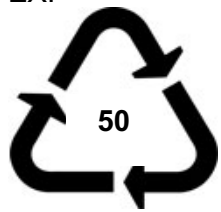

1. Power rating, format accordance with IEC 60950, examples:
 - a. AC power: 100 – 240 VAC, 50/60 Hz, 5 A or 100 – 120 V~, 60 Hz, 30 W or 230 V, 50 Hz, 2 A max. (x2)
 - b. DC power: 28 VDC ===, 5 A max. or 5 A, 24 – 32 V ===, or 28(±4) VDC ===, 25 W
2. Common safety symbols, shall be in accordance with IEC 60417 or ISO 3864-2 or ISO7000:

Function	Symbol	Standard	Usage
Power On		IEC 60417, No. 5007	Turn on power for device.
Power Off		IEC 60417, No. 5008	Turn off power for device.
Power On/Off		IEC 60417, No. 5010	Push on and off hard switch, cut off AC power to primary circuit.
Standby		IEC 60417, No. 5009	For secondary switch. (e.g. controlling the Power Supply)
Protect Earth (PE) Ground		IEC 60417, No. 5019	First Ground into the equipment, from Appliance inlet or EMI filter, connected to building/earth. This safety stub needs its independent nut and star washer.
Protective Bonding Ground		IEC 60417, No. 5017	Use internally for all other safety grounding beside PE. Not required for functional Ground.
Chassis Ground		IEC 60417, No. 5020	Use on external chassis stub.
Electric Shock hazard		ISO 3864, No. 5036	High voltage warning.
Hot surface warning		IEC 60417, No. 5041	High temperature warning.
Two power source		IEC 60950-1 or equivalent(or similar symbol or wording)	Safety warning to disconnect all input for multiple power sources.

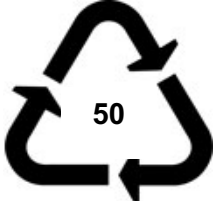

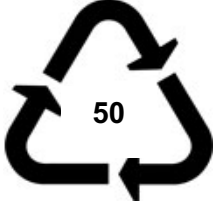

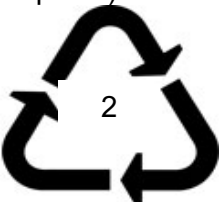

3. Common safety colors, shall comply with IEC 60073:
 - a. Ground wiring: Any insulation shall be green-and-yellow.
