## Hazardous Material Declaration of Product Conformance

**Viasat Document Part Number:                      Rev**

Viasat Inc. is committed to providing Environmental Compliance data to our customers and regulatory bodies as required by contract or law. Viasat uses various methods and database software to perform data collection and analysis as well as identification of hazardous materials within Viasat products.

The databases allow for compliance reports to be run. The compliance reports, chemical data, and chemical disclosures for the products are used to evaluate the material and make proper disclosures.

The environmental compliance regulations and data collection is constantly evolving and changing. Viasat is continually changing and updating our systems to add new environmental compliance data as it becomes available. The following declaration is based on the methods described and information Viasat has at this time.

Please contact your Viasat Program Manager or the Environmental Compliance team at [Compliance-ProductEnvironmental@viasat.com](mailto:Compliance-ProductEnvironmental@viasat.com) if you have any questions concerning this Declaration.
